

Crookwell High School wanted to update all their spaces with new and engaging furniture.

PROFILE

Crookwell High School

Located in New South Wales, Crookwell High School partnered with Sebel to upgrade their classrooms in order to create a brighter space for their staff and students.

Updating the school with newer and more modern furniture was a major part of the brief for this refurbishment project. Using a range of different furniture solutions, Crookwell High School wanted to create a functional space that incorporated brighter colour through the use of furniture. We reinvented the space using different colour schemes that complimented each other for each of the tiered learning settings. This was with the purpose of reinventing the space.

Sebel has worked with faculty members at Crookwell High school to upgrade a total of 14 classrooms into brighter and more engaging learning environments. Using a mix of Postura Max® Chairs, Create-A-Tables and Benches, Storage and Big Softie Ottomans, these spaces were reinvigorated. Brighter finishes and colour pops in the chairs were used to give the school a fun and colourful make over.

It has been a pleasure working on this project with Crookwell High School and we look forward to seeing the students and staff enjoy these new and colourful spaces.
