

# Performance Edge®

Get the edge

Sebel Performance Edge® tabletops use a unique patented design tapered edge which is ultra-comfortable and perfect for extended use. The Performance Edge® tapered edging reduces pressure on students' forearms caused by leaning and writing, making them the most comfortable tables around.

The Performance Edge® tabletops use a superior hard-wearing material compared to regular rigid edging. Unlike traditional table edging where glue is utilised to stick the edging onto the table, the injection moulded polypropylene Performance Edge® is placed into an injection moulding tool, forcing the molten polypropylene material into the fibre of the board which makes the edging virtually pick proof and almost impossible to delaminate or peel off.

The unique edging not only enhances user comfort, but it also reduces damage done to walls and other furniture whilst moving tables around to change between learning modes.

The Sebel Performance Edge® edging is available in a wide range of tabletop shapes and sizes, along with being available in many different colours depending on the tabletop finish.

The colours shown have been reproduced to represent actual product colours as accurately as possible, however actual colours may vary. We recommend contacting your Sebel representative for a sample swatch for comparison prior to ordering. For more information or samples, contact your Sebel representative, or email [sales@sebel furniture.com](mailto:sales@sebel furniture.com)
