

Duralite Folding Table

Made to move, built to last. Everything about the Duralite is designed for daily use - from the stackable design and replaceable corner covers to its smooth folding legs and easy transport via trolley. It's the kind of table that doesn't ask for much but delivers over and over again.

Features

Exceeds stringent tests for leg strength, weight load and vertical drops onto hard surfaces

Replaceable corner covers and exclusive design innovations boost weight-bearing strength

Rubber bumpers protect tables when stacked and hold them in place on dollies

Legs are easily replaceable

Strong metal-to-metal attachments for maximum holding power - screw holes won't strip

Materials

Top - Top is composed of 0.080" thick, high impact Lustran 752 ABS top shell

Extruded aluminum channels create a framework around the entire perimeter

$\frac{3}{4}$ " thick honeycomb cellular core is chemically bonded under pressure

Legs - Fixed height legs are constructed of 18 gauge, 1-1/8" o.d., seam-welded tubular steel with a non-marring polyethylene glide

Dimensions

Width (mm)	Depth (mm)	Height (mm)
1830	760	740

Max load - 907kg, evenly distributed
